

Educate. Engage. *Inspire.*

Just some of the things you'll do on the Thielke Expert Council.

**Do you have a background in science, technology, engineering, or math?
If so, please join the Thielke Expert Council.**

We encourage teens to use the Arboretum and the new Environmental Education Center to learn about science and the environment. Many teens are eager to understand environmental issues that require substantial explanation. Reward that intellectual curiosity by sharing your knowledge!

Learn more about Thielke Teen Projects at our website. We've created some categories to help teens get started: Stewardship, Educating others, Research, and Innovation. Whatever their interest, we'll help them create a project.

Email us at Teens@Thielkearboretum.org We'll send you a link to register as an adult volunteer on the Expert Council. We'll work with you to make sure this fits your time and interests.

Start inspiring others! Here are some of the ways:

Create a team. Much like sports, you can create a teen team to collaborate on a project.

Give a talk. Speakers are welcome!

Suggest projects. We'll share with students looking for projects.

Attend a teen event. Offer advice or suggestions to students.

Donate equipment. Hands-on work is always engaging.
