

Auditorium Renovations at Central Elementary School

The renovation of Central's auditorium will feature much needed safety and accessibility improvements but will keep the character and feel of the original theatre. The updated auditorium will free up much needed community space, alleviating congestion at the HS/MS auditorium, creating an additional venue for district events. The project will include:

- Accessible chairlift to the stage
- Handicap accessibility to the theatre making the room ADA compliant
- Installation of acoustical improvements and a new sound system
- New lighting, curtains and the addition of aisle lighting
- Replacement of broken seating and refinishing of splintered flooring

Auditorium

Sports Field Repairs at Alexander Hamilton Elementary School

The reconditioning of the sports field at Hamilton Elementary School will benefit not only Hamilton students but all the participants in the middle school sports and Glen Rock's recreation programs that utilize Hamilton's fields. The work will include:

- Sodding the sports field and refinishing the tops of the ballfields for safety improvements to the playing surfaces
- New irrigation system to replace non-working systems
- ADA upgrades to the bleacher access and pathways

Field Improvements

Glen Rock Public Schools

Voting on the referendum will be held March 12, 2019 from 6am-8pm at your district polling location.

The total cost of the project is \$14,718,320. Glen Rock is projected to receive \$4,503,430 from the New Jersey Department of Education debt service aid reducing the taxpayers' share of the bond project to \$10,214,890.

The estimated tax impact on an average assessed home valued at \$563,170 would be \$14.60 a month on a 20-year bond or \$18.09 on a 15-year bond.

Additional information is available on the district's website, www.glenrocknj.org. Residents can visit the site to learn more about cost, construction, project schedule, guidelines, and other details. An interactive Q&A is available to post questions that will be answered by the Glen Rock administration.

Glen Rock Board of Education

approved the submission of plans to the NJ State Department of Education for a March 12, 2019 referendum.

The projects for consideration are:

AIR CONDITIONING classrooms for the four elementary schools

Renovation of the AUDITORIUM at Central School

Renovations to the HS/MS MEDIA CENTER

FIELD IMPROVEMENTS to the Alexander Hamilton School field

Media Center

Media Center Renovations at Glen Rock High School and Middle School

The newly updated media center will be a flexible/collaborative work space featuring a glass partition to allow middle and high school students to use the center simultaneously. The redesigned space will also feature one large flexible classroom which will consist of an adjustable partition allowing for two sectioned classrooms. With the look and feel of a college media center, the renovated room will offer students an open space where they can learn, socialize, and work on computers. Highlights of the project include:

- Converting existing computer lab into a state-of-the-art television/broadcasting studio
- A cutting-edge makerspace classroom, creating collaborative work spaces for learning and exploring
- Moveable furniture that can be configured based on space needs
- Lighting upgrades
- New storage area
- Rooftop units (condensers for AC) replacements for improved indoor environment

Air Conditioning Upgrades at All Four Elementary Schools

In keeping with Glen Rock Board of Education strategic goals for the 2018/2019 school year, the referendum includes air conditioning (AC) installation at all four elementary schools in spaces where AC systems do not currently exist. The inclusion of AC supports district initiatives to enhance the safety, health and well-being of our staff and students. The AC install will contribute to the comfort of student and staff while supporting learning and teaching. The new AC will provide fresh air levels required by code, unlike window units which do not provide enough cooling to withstand humidity. The scope of the project will include but will not be limited to:

- New condensers will be installed to provide cooling in all classrooms currently without AC
- New metal shelving and chases will be installed as needed
- Existing ductwork to be modified as needed
- Existing exhaust fans to be repaired/replaced as required
- Electrical upgrades to support AC at Coleman
- Two new boilers at Hamilton
- New building management control system to be installed throughout all four elementary schools
- New cassette units, heat pumps, etc. with modifications to rooftop units for integration with the building management control system
